## Manned Guarding

Manned Guarding is a highly effective way of eliminating criminal damage and theft, certainly one of the highest proactive security measures that you as a client can take against crime.

The manned guarding service offers much more than simply patrolling your premises when staff have left. Responsibilities such as front of house access and exit control, out of hours reception duties and reporting building defects or hazardous areas. Guards fitted with Body Cameras for audible & CCTV footage.

As a business, we believe that it's better to be proactive as opposed to reactive. It's vital that your assets are protected and your insurance cover not compromised.

### Our Mission

'To not only offer a comprehensive range of transparent services to the widest range of market sectors but to deliver those services to the highest standard of customer service whilst adhering to the strictest code of ethics as dictated not just by law; but by common decency and collective humanity. To protect and empower our staff in order that they can develop within our organisation and pass on that knowledge and experience within our business and to the benefit of customers.'
